Providence, RI, 02907

## Full-Stack Projects

- **Work Order Invoice Application:** An application where construction contractors can create log in credentials for their clients allowing the clients to log in and view the details of the work order they will be charged for such as labor, materials, and other charges. Only those with admin privileges can make edits to the work order, clients can view the data as read-only. [See a sample here](#)
- **Timecard Application:** An application allowing users to log in and keep track of their timecard for the week. Previous weeks' timecards can be saved and viewed also. [See it here](#).
- **Note-taking Application:** An application where users can log in and create chapter-by-chapter notes of a subject. These notes are saved to the user's collection to be resumed or edited on demand. [See it here](#).
